Annual report on A-IMS (Academic Information Management System)

Introduction

"A-IMS (Academic Information Management System) has been designed to cover the in depth functionalities of any **Educational Institute/ University/ Group of Institutions**, from the perspective of various users carrying different roles and responsibilities such as **Chairman, Faculties, Students, Employees, Alumni etc.** It also provides other ERP packages like HR & Payroll, Inventory, Transportation, Hostel Management, Training & Placement, Library, Communication methods (SMS, E-Mail, Notifications, feedback, Complaint box etc.) Etc. We have Implemented hardware interaction like biometric. To reduce data error and ensure that information is managed efficiently and is always up-to-date."

A-IMS (Academic Information Management System) is an Education project which manages the entire Administration, Campus operations and academic Management in an efficient way. In this project we have divided all the Campus Activities like Student Admission, Fee Collection, Academics, Test & Exam, Library Activities, Inventory Module Management, Hostel Management, Training and placement all the data is added and managed with this web application.

Generally, it is very difficult for higher authority to Monitor all the Campus operations happening in the Educational institution and even every parent wants to know about their child Exam Marks, Attendance details day to day, so manually sending SMS regarding attendance or exam marks of each student is very difficult for management and in this competitive world doing work is not only important but how smart, fast you are doing work is also very important. Keeping in mind all these difficulties we came up with a solution named A-IMS.
