

## **2.5 Evaluation Process and Reforms**

### **2.5.1 Continuous Internal Evaluation(CIE) system**

## Department of Electrical and Electronics Engineering

### Mechanism of Internal assessment is transparent and robust in terms of frequency and mode

The Department conducts **three internal assessment tests** at approximately 6<sup>th</sup>, 12<sup>th</sup> and 14<sup>th</sup> week respectively.

- In 17 scheme and 18 schemes of VTU under CBCS, the weightage on Continuous Internal Evaluation (CIE) and Semester End Exams (SEE) is assigned as 40:60 ratios. The CIE is to be evaluated for 40 marks, in which CIE Test carries 30 marks and the remaining 10 marks will be awarded based on other parameters like assignments, quizzes, class tests etc as stipulated by VTU Regulation 18OB8.2.
- In a semester, three CIE Tests i.e. Test-1, Test-2 and Test-3 will be conducted for 50 marks each and average of three tests will be reduced to 30 marks to consider it as final CIE component.
- Test papers are set, evaluated and assessed by course teachers and the marks so obtained are share with students.
- Process for setting/selection of the question paper:
  - i. For each CIE Test, Minimum 02 sets of question papers shall be set for each course by the respective course teacher(s) along with scheme of evaluation and solution. The portions/syllabus to be covered will be decided at the beginning of the semester for the First test, and similarly the portion for the Second and Third Internal tests soon after the completion of Test-1 and Test-2 respectively.
  - ii. HOD will pick 01 set and hand over to Test coordinator for printing. The Department EMS coordinator has to submit the selected question paper with scheme (approved by HOD) in sealed cover to the COE before three days of the commencement of the Internals Assessment. The EMS coordinator will further assist the exam cell for taking care of number of copies to be printed and the distribution to the allotted rooms.
  - iii. While setting the question paper the course coordinator should take care to cover all COs and the RBT levels up to level-3 at least.
- Seating plan and table marking is followed even for internal assessment tests and it is displayed on the notice board along with the internal assessment time table.
- Immediately after the test, the course coordinator shall discuss the test paper in the class. The scheme and solution of the course to be evaluated is required to be displayed for student's notice.
- The evaluated blue books shall be made available to students to enable students to gauge their performance in the test.
- The marks to be updated if any changes. If there is a grievance from the student with regard to the marks awarded, the HOD can get it verified/valued by the second/subject expert to guarantee the justice. A final mark of each test is finally entered to AIMS for further needful.

---

## Department of Electrical and Electronics Engineering

---

- Within one week of completion of CIE Test, the Department Test Coordinators has to submit the CIE marks along with CIE Result Analysis to COE.

**During the pandemic, IA Test was conducted through virtual platform in Microsoft Teams**

### **AY:2020-2021 [Odd and Even Semester]**

During the pandemic special care was taken to keep the Test process robust. Invigilators were allotted who monitored the entire process of test conduction.

1. Test Schedule announcement to students through circular
2. Scrutiny of IA-QP as previously followed.
3. Student Group allotment in the Microsoft Teams channel.
4. Invigilators allotment in MS Team Group
5. During the entire Test process, Students have to keep the camera on.
6. Test paper will be deployed in MS Teams Channel using MS Teams Form
7. Test process was video documented and monitored by Invigilator with the assistance of Test coordinator. Dean Academics, Head of the Department, Test coordinator monitored the process by visiting all the MS Teams channels. Instructors were allotted in every group to monitor any technical issues
8. Students entered Name, USN, Signature in every sheet and uploaded the Test script in the submission form provided.

**AY:2020-2021**  
**ODD Semester**

**A. Schedule for Continuous Internal Assessment(CIE)**

**Sample Process: IA-1**

28<sup>th</sup> September 2020

**Circular**

The Faculties are informed to produce 2 question papers in each of your course for IA-1. The question papers should be as per the guide lines of the department, along with CO mapping and BTL. The question papers should get reviewed by the reviewers allotted for your courses prior to the test in the review meeting conducted by HoD.

The scheme with solution is to be provided before conduction of IA-1 and complete the valuation before **16<sup>th</sup> October 2020** and produce CO-attainment of your courses for this test.

### K. IA QP and SCHEME

### FIRST INTERNAL ASSESSMENT TEST

COURSE CODE	: 17EE73	TIME	10AM to 11.30AM
COURSE	: HIGH VOLTAGE ENGINEERING	DATE	09.10.2020
SEM	: VII	MAX.MARKS	50

Q. No.	PART-A (Each Question carries 10 Marks) Answer any <u>Three</u> Full Questions	Marks	CO's	BTL
1.	a. Interpret Streamers theory is applicable for pd value (1Mark) a. >1000mmHg-cm                      b. <1000mmHg-cm c. >1mmHg-cm & <2mmHg-cm      d. >1mmHg-cm	2M	CO1	L2
	b. Interpret the Time Lag for Breakdown is composed of: (1Mark) a. Positive and Negative                      b. Statistical & Formative c. Statistical & Affirmative                      d. Statistical & Paschen			
	c. What is Ionization process. Explain how ionization occurs due to collision and photo-ionization with suitable diagram.	5M	CO1	L2
2.	a. Interpret Paschen found that Voltage is a function only of: (1Mark)  a. Product of the pressure & temperature    b. Product of the pressure & voltage c. Product of the pressure & current          d. Product of the pressure & gap length	2M	CO1	L2
	b. Interpret Cavitations theory states that dielectric strength of liquid dielectric material depends on: (1Mark) a. Temperature                                      b. Electrodes c. Hydrostatic pressure                          d. Voltage			
	c. Explain the current growth expression for Townsends primary and secondary ionization process with suitable diagram.	5M	CO1	L2
3.	a. Solve, What will be the breakdown strength of air for a small gap of 20cm under uniform field condition and standard atmospheric condition: (1Mark) a. 25.57kV/cm                                      b. 24kV/cm c. 20kV/cm    d. 27kV/cm	2M	CO1	L2
	b. Interpret, which is not a type of breakdown mechanism in Solid dielectric: (1Mark) a. Intrinsic breakdown                              b. Cavitation breakdown c. Avalanche breakdown                          d. Treeing & Tracking			
	c. Explain the following methods of breakdown in liquid dielectrics i. Suspended Particle theory ii. Bubbles theory	5M	CO1	L2
4.	a. In an experiment with certain gas, it was found that the steady state current is $5.5 \times 10^{-8}$ A at 8kV at a gap distance of 0.4cm between the electrode plates. Keeping the field constant and reducing the distance by 0.1cm results in a current of $5.5 \times 10^{-9}$ A. Solve for Townsend's primary ionization co-efficient. (1Mark) a. 5/cm-torr    b. 7.676/ cm-torr c. 6.99/cm-torr                                      d. 7/cm-torr	2M	CO1	L2
	b. Interpret, In thermal breakdown, heat generated under d.c. stress (1Mark) a. $W_{dc} = E^2 \sigma$ b. $W_{dc} = E \sigma$ c. $W_{dc} = E^2 \sigma f$ d. $W_{dc} = E^2 \sigma f d$			
	c. Explain Streamers theory with relevant diagram.	5M	CO1	L2

### Department of Electrical & Electronics Engineering

#### COURSE OUTCOMES

CO1	Interpret the conduction and breakdown phenomenon in dielectrics.
CO2	Apply the principles of generation of high voltage, currents and Impulse voltages.
CO3	Apply measurement techniques for High Voltage, current and Impulse voltages.
CO4	Interpret overvoltage phenomenon and insulation coordination in electric power systems.
CO5	Solve the dielectric properties and interpret the testing methods of surge arrestors and switchgear.

Bloom's Taxonomy Level	
L1	Remembering
L2	Understanding
L3	Applying
L4	Analyzing
L5	Evaluating
L6	Creating

Date: 09/10/2020  
 Max. Marks: 50

#### Solution and Scheme of valuation

Question No.	Solution	CO's	BTL	Marks Allocated	
①	a) Option a: $>1000\text{mmHg-cm}$ }	— Col	L2	1 mark	
	b) Option b: Statistical & formative }	— Col	L2	1 mark	
					<u>2 marks</u>
	c) Ionisation is defined as a process of liberation of free electron from a gas molecule with continuous generation of positive ion <u>Ionisation by collision</u> $e^- + A \xrightarrow{E > V_i} e^- + A^+ + e^-$ A = atom, $A^+$ = +ve ion $e^-$ : electron. In collision process, a free electron collides with a neutral gas molecule & gives rise to new electron & the ion. If the energy gained during the travel between collision in a low pressure gas column in which electric field $E$ is applied across two parallel plates becomes high then it causes a liberation of electron from its atomic shell <u>Photo ionisation</u> The ionisation caused by cosmic radiation or photons is called photo ionisation. It occurs when the amount of radiation energy	—		1 mark

## Department of Electrical and Electronics Engineering

---

### **AY:2020-2021**

The Department follows the following components for the evaluation of **Assignments (10 Marks/Course)**.

The components below can be considered for 6Marks under Component A. Remaining 4 marks is assigned for skill enhancement through MOOC Certification under Component B

#### **Component A: Assignment**

1. Quiz on the topics relevant to the syllabus or beyond syllabus. (Weightage of 2 Marks)
2. Write Up Assignment (Solving VTU QP/Descriptive/Numerical Questions). (Weightage of 2 Marks)
3. Group assignments (Weightage of 2 Marks)

#### **Component B: MOOC Certification**

- For registration of the course (Weightage of 2 Marks)
- Completion of the course (Weightage of 2 Marks)

1.Kirchhoff's current law states that

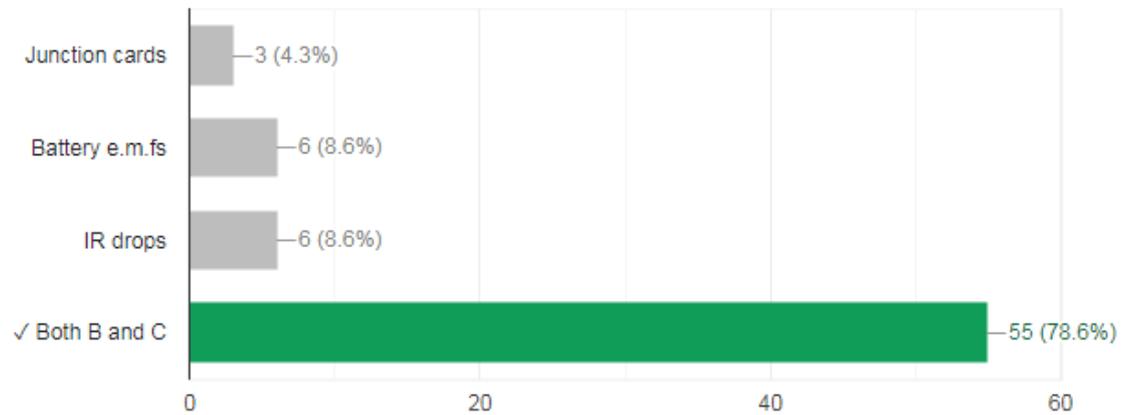

61 / 70 correct responses

## Department of Electrical and Electronics Engineering

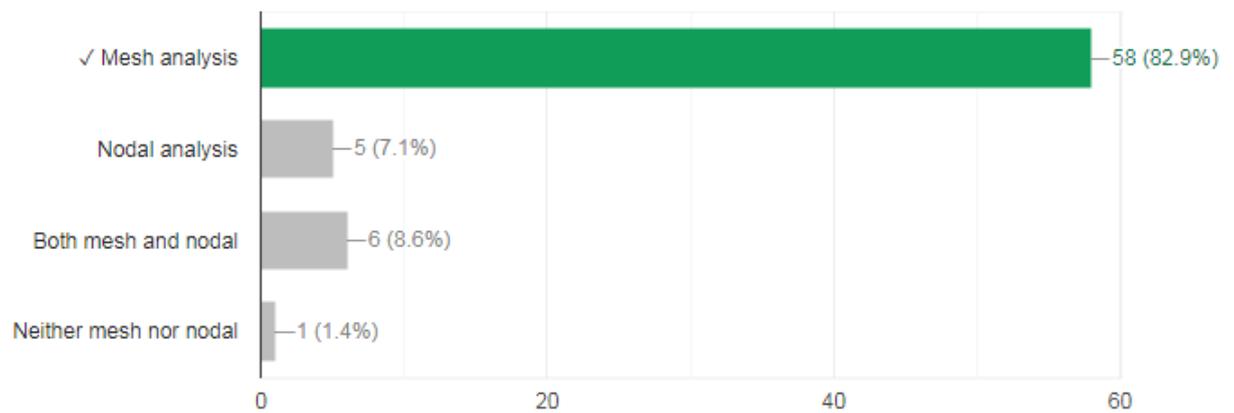

2.Kirchhoff's voltage law is related to

55 / 70 correct responses

3.KVL is applied in \_\_\_\_\_

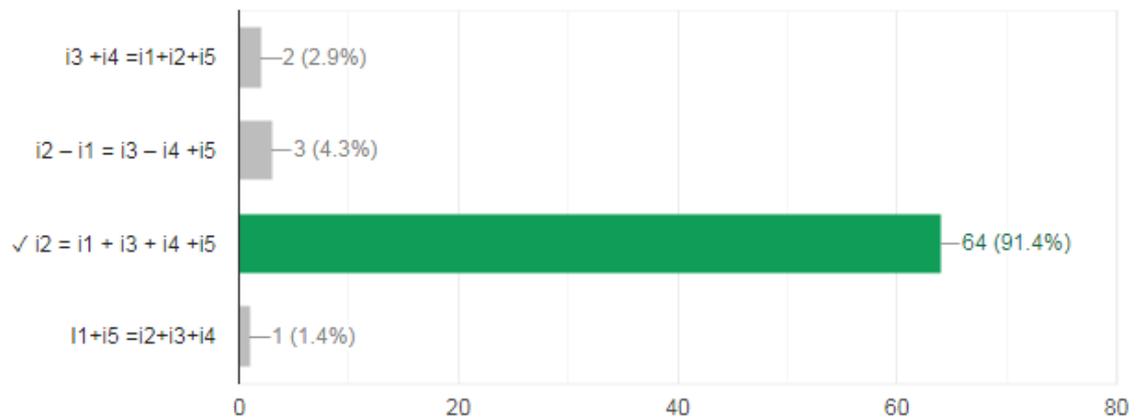

58 / 70 correct responses

## Department of Electrical and Electronics Engineering

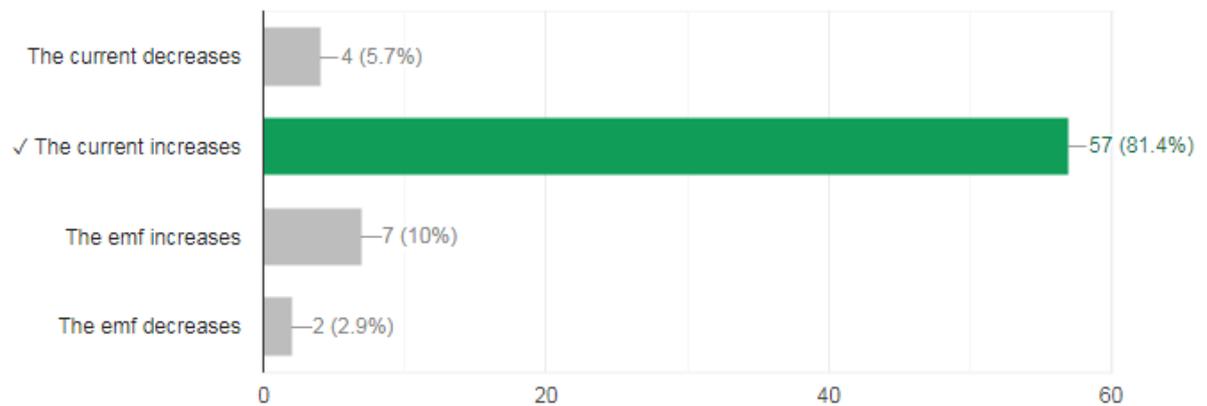

4.If  $i_1, i_3, i_4, i_5$  are the entering currents,  $i_2$  is the leaving current, how is the equation represented?

64 / 70 correct responses

5.When the cells are connected in parallel, then

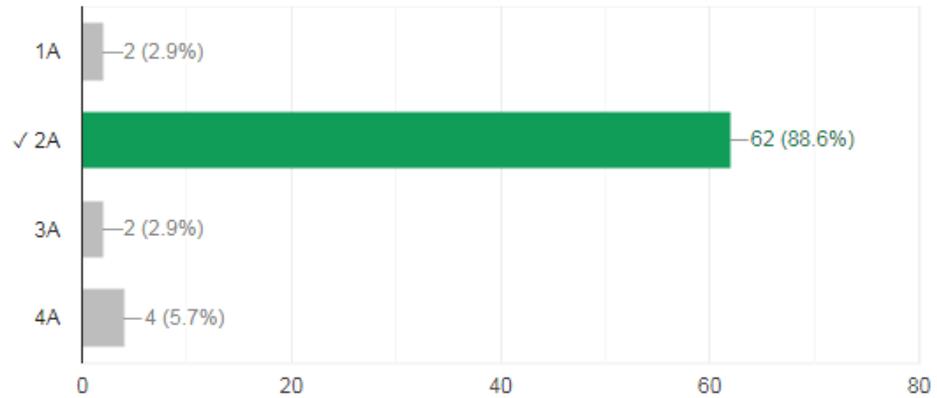

57 / 70 correct responses

## Department of Electrical and Electronics Engineering

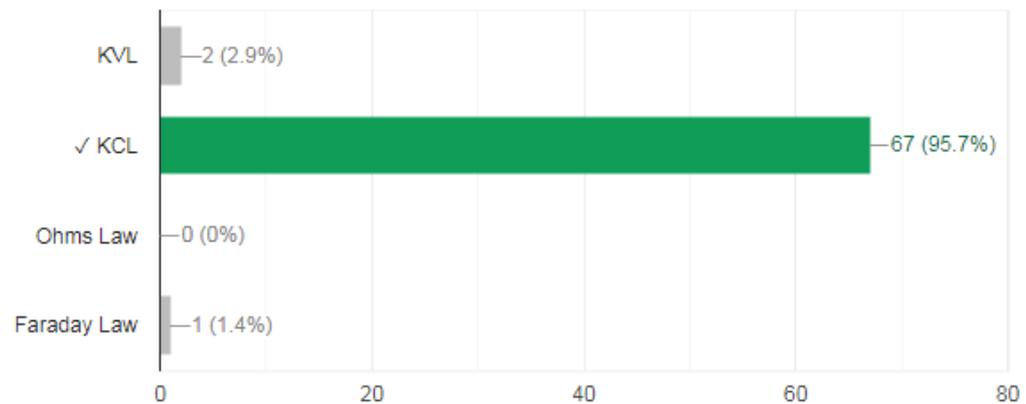

6. If  $i_1, i_3$  are the entering currents;  $i_2$  is the leaving current, determine  $i_4$  if  $i_1=5A, i_2=6A, i_3=3A$

62 / 70 correct responses

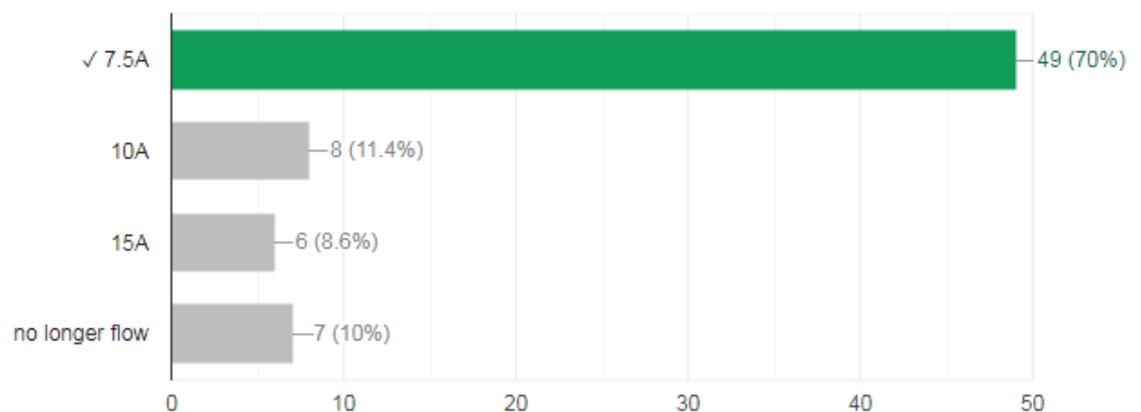

7. Which of the following laws is used in the nodal analysis of the network

67 / 70 correct responses

8. Certain circuit has three incoming currents having values 5 A, 9 A, and 1 A and two outgoing currents passing through two parallel resistors having equal values of resistance. The outgoing current flowing through first parallel resistor will be

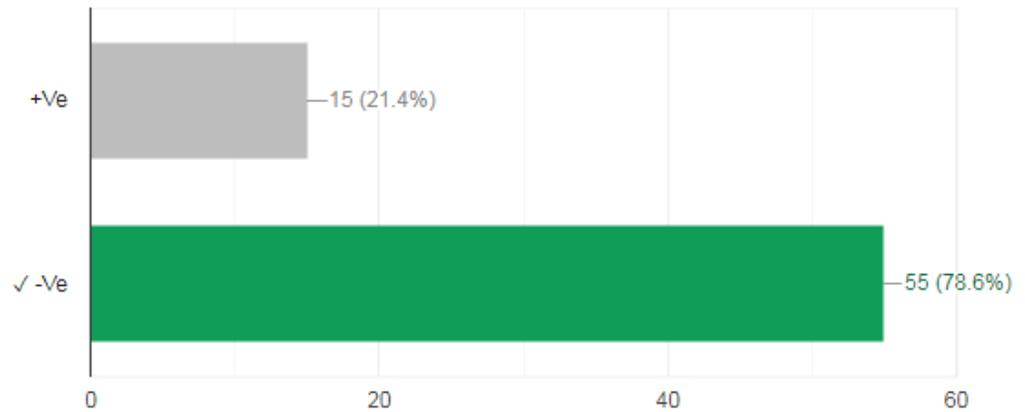

49 / 70 correct responses

## Department of Electrical and Electronics Engineering

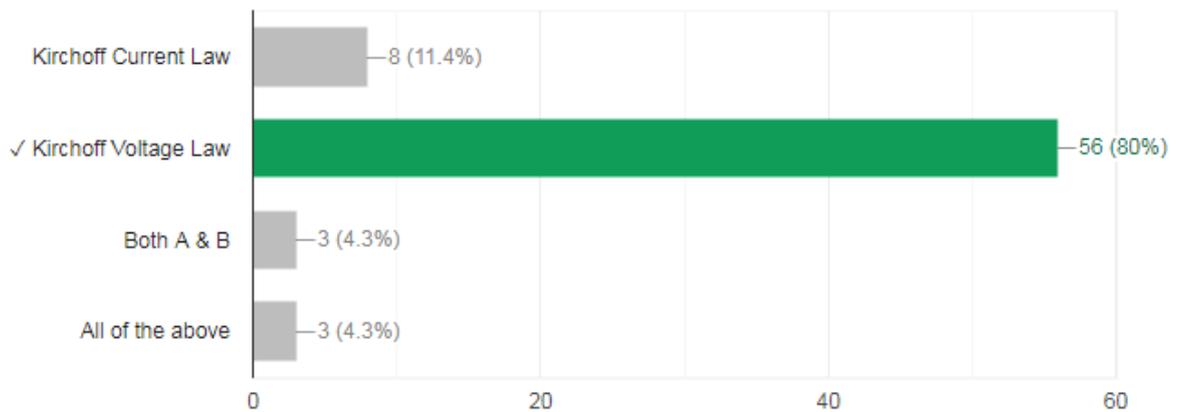

9. As per Kirchoff Law, Potential Drop is considered with what sign

55 / 70 correct responses

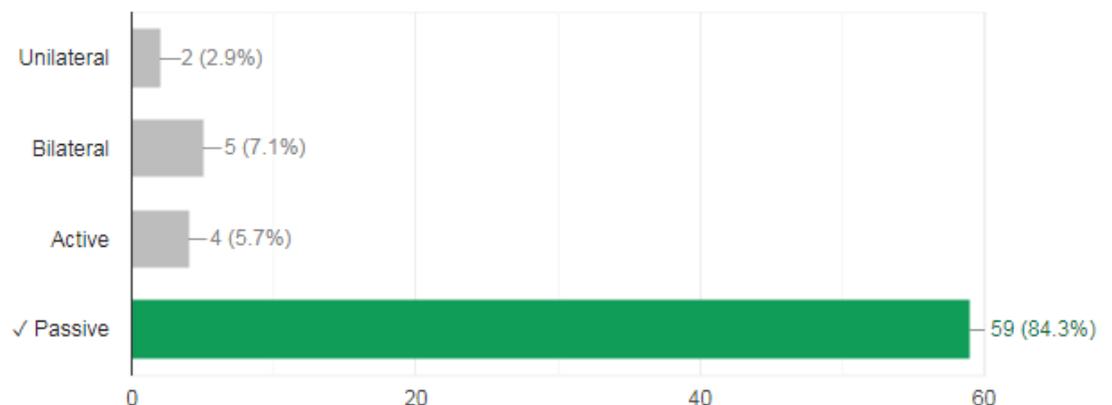

10. Algebraic sum of  $I \cdot R$  and Algebraic sum of  $E$  in a closed network is Zero. Which Law States this?

56 / 70 correct responses

11. A circuit having neither any energy source nor e.m.f. source is called the .....circuit

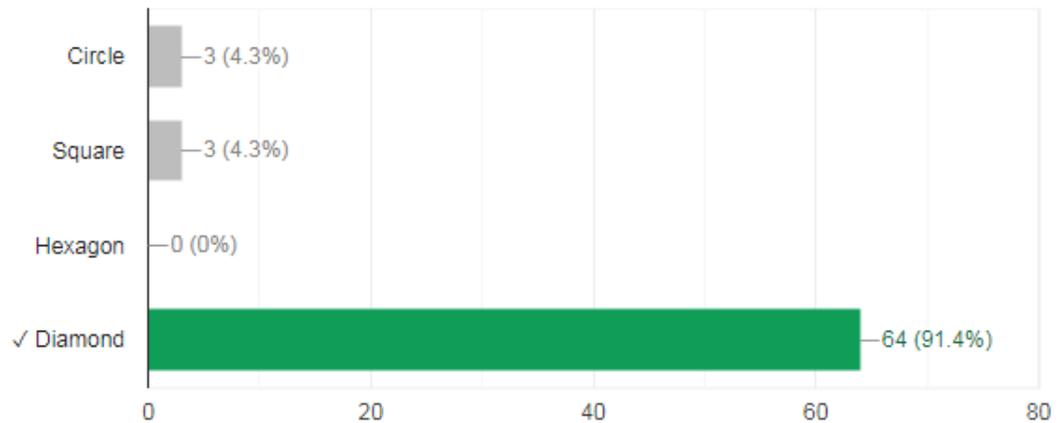

59 / 70 correct responses

## Department of Electrical and Electronics Engineering

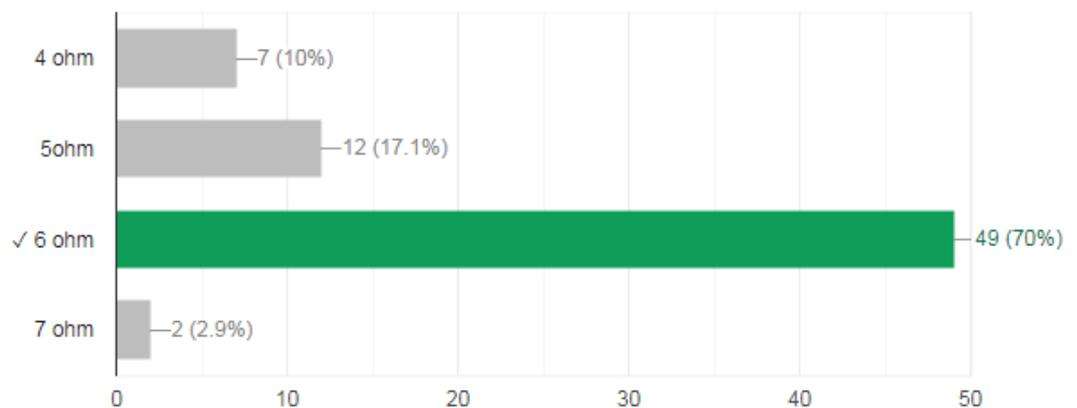

12. The dependant sources are normally represented in what shape?

64 / 70 correct responses

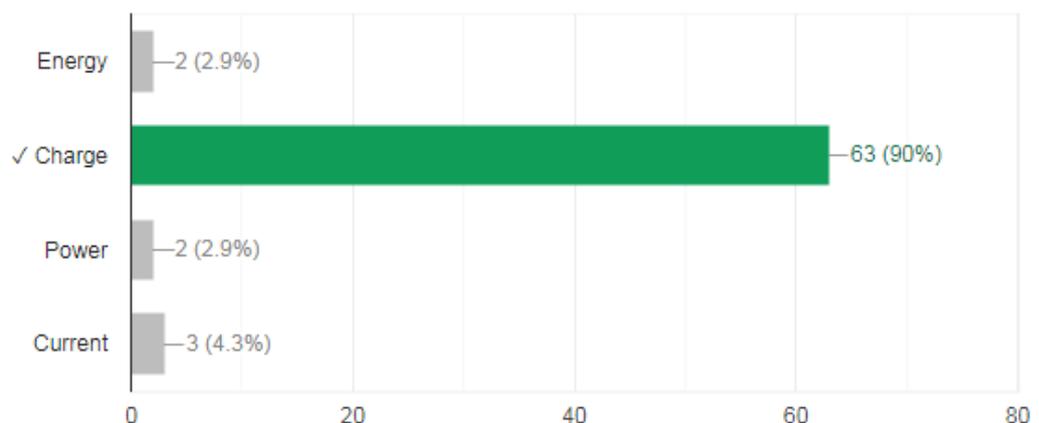

13. A resistance of 10 ohm is connected in series with the two resistance of each of 15 ohm arranged in parallel, what resistance must be shunted across this parallel combination so that the total current taken will be 1.5A from a 20V supply fed.

49 / 70 correct responses

14. KCL is a consequence of Law of conservation of

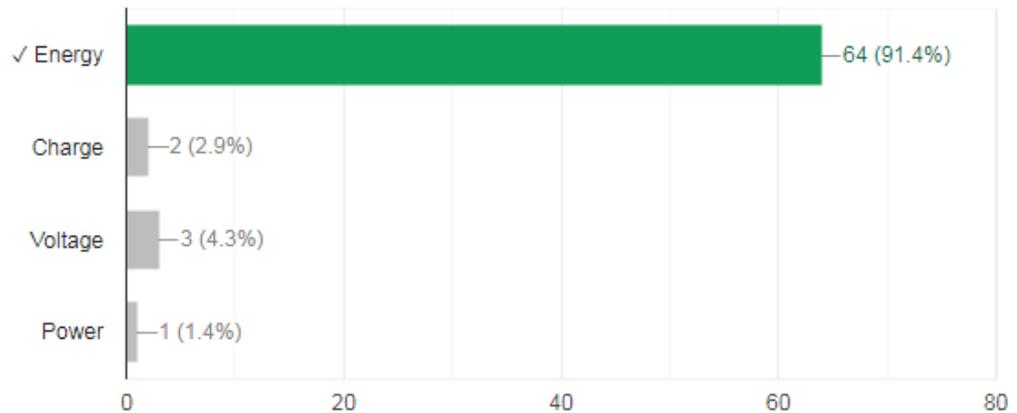

63 / 70 correct responses

## Department of Electrical and Electronics Engineering

15.KVL is a consequence of Law of conservation of

64 / 70 correct responses

Amrutha JS electrical assignment.pdf

Assignment - I  
Amrutha JS  
4002010047  
Date: / /

iv) With relevant expressions and diagram. Explain Ohm's law. What are the limitations of Ohm's law.

→ Ohm's law: The current flowing through the electric circuit is directly proportional to the potential difference across the circuit and inversely proportional to the resistance of the circuit, provided the temperature remains constant.

Ohm's law is,  
 $I = \frac{V}{R}$  ampere  
 $V = I \times R$  Volt  
 $\frac{V}{I} = R$  ohm

Ohm's Law Triangle

①  $V = I \times R$

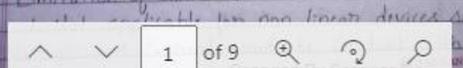

②  $I = \frac{V}{R}$

③  $R = \frac{V}{I}$

Definition:  
At constant temperature,  $I$  flowing through the circuit is directly proportional to the potential difference across the ends of the conductor.

Limitation of Ohm's law  
Ohm's law is not applicable to non-linear devices since their resistance varies with temperature.

Dept. of Electrical & Electronics Engineering  
ATME College of Engineering, Mysore

Department of Electrical and Electronics Engineering

1st assignment EEE.pdf

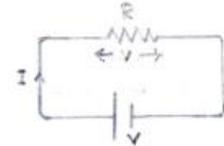

**ELECTRICAL AND ELECTRONICS  
ASSIGNMENT - 01**

Q1. With relevant expressions and diagram. Explain Ohm's Law.  
What are the limitations of Ohm's law.

Solution: write the following details

1. Definition
2. Circuits and Equation
3. Ohm's Law Triangle
4. Limitations

1. Definition: Ohm's law states that "The current flowing through a conductor is directly proportional to the potential difference across its ends", provided at constant temperature and other physical conditions remain constant.

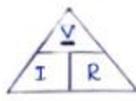

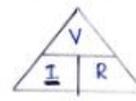

In the above figure, 'I' is the current through the conductor of resistance and 'V' is the potential difference across its ends, then by Ohm's law.

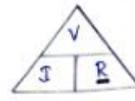

$I \propto V$   
 $V = I \times R$

The relation between current, voltage can be expressed in 3 ways

①  $V = IR$     ②  $I = V/R$     ③  $R = V/I$

shashank S N,4AD20EC063.pdf

### Assignment - 6

1. Define frequency, peak factor, form factor, Average value, RMS value.

frequency: The number of cycles completed by an alternating quantity per second is known as its frequency. It is denoted by  $f$  and is measured in cycles/second which is known as hertz.  $f = \frac{1}{T}$  Hz

Form factor ( $k_f$ ):

The form factor of an alternating quantity is defined as the ratio of r.m.s value to the average value

$$k_f = \frac{\text{r.m.s value}}{\text{average value}}$$

Peak factor ( $k_p$ )

The peak value of an alternating quantity is defined as the ratio of maximum value of the r.m.s value.

$$k_p = \frac{\text{maximum value}}{\text{r.m.s value}}$$

Average value: The average value of an alternating quantity is defined as that value which is obtained by averaging all the instantaneous values over a period of half cycle.

To Measure the Dielectric Strength of Transformer Oil

Objective:

To determine the dielectric strength of the given transformer oil.

Components required:

Fig.1: Portable oil testing set

Fig.2: HV transformer

Fig.3: Gap setting gauge

## Department of Electrical and Electronics Engineering

### Connection diagram:

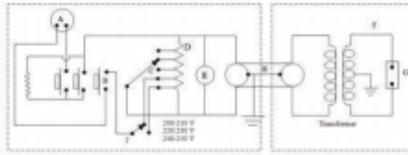

Fig 4: Portable oil testing set (50 kV)

- A- Socket for Supply loads
- B- Push
- C- Multiple Point Control
- D- Auto Transformer
- E- Voltmeter
- F- Step up Transformer
- G- Test Cell
- H- Inter Connecting Cable
- I- Supply Voltage Selector Switch

### Theory:

The two unit portable testing set is designed for the periodical testing of samples of insulating oils drawn from plant on site and for checking the dielectric strength of new samples of oil. The equipment is designed to operate from 200/250V, 50Hz, Single phase AC supply. Test gap voltage up to 50kV, it consists of two units, one is containing the testing transformer and other control and metering equipments. These equipments are kept in a metal box to provide full protection to the apparatus during transport and storage. The gap is adjusted between electrodes in accordance with British Standard Specification (BSS) no. 148.

### Procedure:

1. Place the High Voltage transformer unit about 7 away from the control unit.

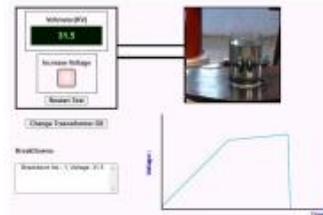

2. The control unit is connected to supply voltage taking care that the earth connections are effective.
3. The multiple point control switch is set at its lowest tapping.
4. The push button on control unit is pressed firmly for at least 5 seconds. Note that no Breakdown to occurs, in which case button should be released at once without delay. Break down is indicated by a continuous discharge across the gap, bubbling of oil in the cell and meter indicating a sudden voltage drop.

### Observations:

Sl no.	Breakdown voltage
1.	31.5
2.	30.3
3.	28.6
4.	31.5
5.	29.4

### DEPARTMENT OF ELECTRICAL & ELECTRONICS ENGINEERING

COURSE: BASIC ELECTRICAL ENGINEERING

COURSE CODE: 1SELE17

SEMESTER: II

SECTION: A

**TOPIC:** Measurement of Three Phase Power using two wattmeter method

#### TEAM MEMBERS:

1. NIRANJAN – 4AD20EC044
2. NIKHIL H N – 4AD20EE007
3. PONNANNA C P – 4AD20EE014
4. NITHIN GOWDA S – 4AD20CV021

### Measurement of Three Phase Power using two wattmeter method

**Objective:** Power Measurement in Balanced 3-Phase Inductive Load Using Two Wattmeter

#### Apparatus Required:

Sl. No	Particulars	Range	Quantity
1	Ammeter	(0-5) A	1
2	Voltmeter	(0-600V)	1
3	Wattmeter	600V, 0-5 A, 1PF	02
4	3- $\phi$ Star connected Inductive Load (Balanced)	-	-

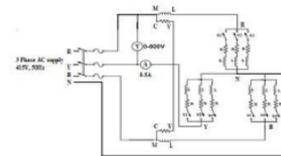

#### Theory:

The current coils of the two wattmeters are inserted in any two lines and the potential coil of each joined to the third line. It can be proved that the sum of the instantaneous powers indicated by wattmeter W1 and wattmeter W2 gives the instantaneous power absorbed by the three loads L1, L2 and L3. A star-connected load is considered in the following discussion although it can be equally applied to Delta-connected loads because a delta connected load can always be replaced by an equivalent star-connected load.

#### Variations in Wattmeter Readings

- When  $\phi = 0$  i.e. power factor is unity (i.e. resistive load) then,  $W1 = W2 = \sqrt{3} V_L I_L \cos 30^\circ$ , both wattmeters indicate equal and positive i.e. up-scale readings.
- When  $\phi = 60^\circ$  i.e. power factor = 0.5 (lagging) Then  $W2 = \sqrt{3} V_L I_L \cos (30^\circ + 60^\circ) = 0$ . Hence, the power is measured by W1 alone.
- When  $90^\circ > \phi > 60^\circ$  i.e.  $0.5 > p.f > 0$ , then W1 is still positive but reading of W2 is reversed because the phase angle between the current and voltage is more than  $30^\circ$ . For getting the total power, the reading of W2 is to be subtracted from that of W1, under this condition W2 will read "down scale" i.e. backwards. Hence, to obtain a reading on W2 it is necessary to reverse either its pressure coil or current coil, usually the A.I. readings taken after reversal of current coil or pressure coil are to be taken as negative.
- When  $\phi = 90^\circ$  (i.e. pure inductive or capacitive load), then  $W1 = \sqrt{3} V_L I_L \cos (30^\circ + 90^\circ) = -\sqrt{3} V_L I_L \sin 30^\circ$ ,  $W2 = \sqrt{3} V_L I_L \cos (30^\circ - 90^\circ) = -\sqrt{3} V_L I_L \sin 30^\circ$ , as seen, the two readings are equal but of opposite sign. Therefore  $W1 - W2 = 0$ .

#### Circuit Diagram:

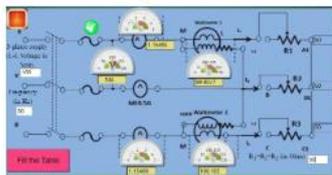

#### Procedure:

1. Connections are made as shown in the circuit diagram.
2. Keep all the load switches in the off position and close the supply switch.
3. Apply balanced load in steps and note down the readings of ammeter, voltmeter & both wattmeters.
4. Switch off the loads and open the supply switch.
5. Calculate the active power and reactive power.
6. Repeat the procedure from steps 2 to 4 and calculate active power and reactive power.

**The Multiplication Factor (MF) of the wattmeter:** Multiplication Factor (MF) = (voltage range  $\times$  current range  $\times$  power factor) / (range of the wattmeter scale)

#### Variations in Wattmeter Reading when R= 25ohm

#### Variations in Wattmeter Reading when R= 50ohm

#### The actual power measurement is the scale reading multiplied by the Multiplication Factor (MF)

Sl. No.	V <sub>ph</sub>	I <sub>a</sub>	V <sub>ph</sub>	I <sub>a</sub>	I <sub>s</sub>	W1 in watts (Wattmeter Constant $\times$ W1)	W2 in watts (Wattmeter Constant $\times$ W2)	Active Power consumed (Watt)
1	100	2.0090977	100	2.0090977	2.0090977	199.81887	200.20609	400.02496
2	100	1.1846988	100	1.1846988	0.907788	100.10304	200.01083	300.11387
3	100	0.8773494	100	0.8773494	49.983892	86.051823	100.00841	186.06023
4	100	0.2886747	100	0.2886747	0.2886747	24.976946	28.028761	53.005707

**Outcomes:** After completion of this experiment the students will be able to do measurement of Three Phase Power using two wattmeter method.

### Mechanism of internal assessment is transparent and robust in terms of frequency and mode.

The Department of Electronics and Communication Engineering conducts **three internal assessments**. First assessment will be conducted at 6<sup>th</sup> week, second at 12<sup>th</sup> and third at 14<sup>th</sup> week from the commencement respective semester. The IA Committee informs the test schedule to the faculties and students through a circular. Also the faculties are informed to set the question papers as per the guidelines in the IA Circular and has to mail to the Head of the Department on or before the deadline mentioned in the circular.

The review committee headed by the HOD and the senior Professors of the department will review the question papers set by the faculties and suggest for modifications if any and selects the question paper. Each test will cover one third of the syllabus. After valuation, the scheme and solutions are discussed in the class and the marks are uploaded into the CERP portal. From the CERP portal the results are sent to the parents.

## **ONLINE TEST PROCESS**

## Academic Year 2020-21 (Odd Semester)

Due to COVID pandemic the internal assessment during the academic 2020-21 Odd Semester was conducted in **ONLINE MODE using Microsoft Teams Platform**. The IA process for the same is as follows:

1. The test schedule was intimated to both faculty and students.
2. The question paper scrutiny was done as earlier.
3. The test was conducted through MS Teams.
4. Each Invigilator was allotted with maximum of 20 students to monitor.
5. Invigilators have to create a separate channel and the allotted students have to join the respective channel.
6. Question Papers were posted in MS Teams at the start of the test.
7. Students were instructed to turn on the video for complete duration of the test without fail.
8. The test invigilation was recorded by each invigilator.
9. Also, the test was monitored by the Head of the Department, Dean(Academics) and Online IA Squad Committee.
10. After completion students were instructed to upload the scripts in the MS Teams only with the file name as **USN\_Name**.

## **IA CIRCULAR**

Date: 07/10/2020

**IA CIRCULAR**

All the faculty members are hereby informed to set the internal assessment question papers and mail the same to [ecceiaqpatmece@gmail.com](mailto:ecceiaqpatmece@gmail.com) on or before **08<sup>th</sup> October 2020**. The guidelines to set the question paper are as follows:

1. The faculty should prepare 2 different sets of question paper for the respective subjects without any repetitions.
2. The question paper format, Guidelines for faculty to conduct online IA and the First Online Internals 2020-2021 odd semester time table is attached for your reference.
3. The faculty should prepare common question paper irrespective of section.
4. The Head of the Department will select any one among 2 sets of question paper and the same will be issued during the internal assessment.

**Examination Committee**

Mr. Pradeep Kumar Y 

Mr. Manjunath K 

Mrs. Harshitha N 

  
**HOD**

## GUIDELINES FOR FACULTY TO CONDUCT ONLINE IA

1. Online Test has to be done using M S Team Platform.
2. Every Faculty in the Department has to be assigned 15 to 20 students for Internal Assessment (IA) Invigilation/Online monitoring.
3. Each Department has to create a Team naming as “**Internal Assessment 2020-21 (Odd)**”.
4. Further, each Faculty/Invigilators (Assigned in Sl. No.2) has to create a Channel under the above-mentioned team as follows:

### **IA\_Faculty Initial**

5. Each Faculty has to schedule the meeting one day prior to the online Test as per IA Time Table.
6. The invigilators have to login 15 minutes prior to the test commencement and make sure that all the students have joined the session and seated at proper position to take the test.

**NOTE:** Dr M S Govinde Gowda (Dean Academics), Dr Yathisha L and Mrs. Sneha N P (Dean Academics Supporting Faculty Members) should be added to the Test Team “Internal Assessment 2020-21 (Odd)”.

  
HOD

Date: 07/10/2020

### FIRST IA CIRCULAR FOR STUDENTS

This is to inform all the students that First Online Internals 2020-2021 for odd semester is scheduled on **8<sup>th</sup>, 9<sup>th</sup> and 10<sup>th</sup> of October 2020**. The guidelines for Online IA and First Online IA time table are attached for your reference.

#### Examination Committee

Mr. Pradeep Kumar Y 

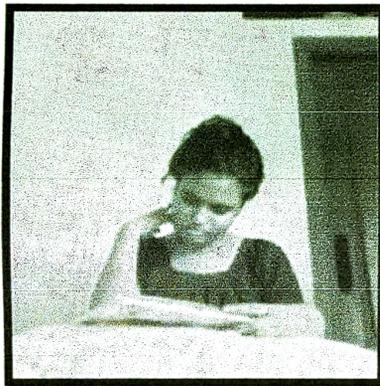

Mr. Manjunath K 

Mrs. Harshitha N 

  
HOD

## **GUIDELINES FOR STUDENTS TO ATTEND ONLINE IA**

1. The Online test is scheduled as follow Morning Session 10.00 AM to 11:30 AM and Afternoon Session 2:30 PM to 4:00 PM.
2. The students should login to the scheduled session before 15 minutes (video can be switched on 5 minutes Prior to the test) to the commencement of the test and adhere to the instructions provided by the Invigilators.
3. The students must set the place in home in prior before taking the test. The place selected should be silent and video should be visible to invigilator.
4. The sitting position during internals should be as in below pic only; if you guys fail to setup as shown in pic, those candidate paper will be considered as malpractice and evaluation is not done.

Position 1

Position 2

5. After the write up, the next 15 minutes, the students have to scan the answer sheet and upload the same in the specified folder ("Assignment" tab in M S Team).
6. The format to name the scanned document is follows: USN\_Name\_Subjectcode.
7. This process has to be completed within 15 minutes i.e., between 11.30 AM to 11.45 AM and for afternoon session 4.00 PM to 4.15 PM; else it will be considered as malpractice.

**FIRST INTERNAL ASSESMENT**

<b>COURSE</b>	:	<b>Electronic Devices</b>	<b>TIME</b>	:	<b>10.00 to 11.30 AM</b>
<b>COURSE CODE</b>	:	<b>18EC33</b>	<b>DATE</b>	:	<b>28-01-2021</b>
<b>SEM/SEC</b>	:	<b>3<sup>rd</sup> Semester 'C' Section</b>	<b>MAX. MARKS</b>	:	<b>50</b>

		<b>PART-A-Answer any three full Questions</b>	<b>Marks</b>	<b>COs</b>	<b>BTL</b>
01.	<b>1a)</b> Which of the following type is not included in the primary type of bonding in solids? a) Ionic Bonding b) Non-Metallic Bonding ✓ c) Metallic Bonding d) Covalent Bonding	2 M	1		L1
	<b>1b)</b> Explain the three primary types of bonding in solids.	8 M			L1, L2
02.	<b>2a)</b> The atomic number of Sodium (Na) and Chlorine (Cl) is a) 11 and 17 respectively ✓ b) 17 and 11 respectively c) 12 and 18 respectively d) 18 and 12 respectively	2 M	1		L1, L2
	<b>2b)</b> Define Hall Effect. With the help of neat diagram, prove that mobility is the ratio of Hall coefficient and resistivity.	8 M			L1, L2
03.	<b>3a)</b> Which of the following statement is true? a) Empty bands do not contain electrons b) Partially filled bands do contain electrons as well as available energy levels c) Completely filled bands do contain plenty of electrons d) All statements are correct ✓	2 M	1		L1, L2
	<b>3b)</b> Discuss the effects of Temperature and Doping on mobility. Elaborate your answer with the help of suitable diagrams.	8 M			L1
04.	<b>4a)</b> Which of the following is not a pentavalent impurity? a) Phosphorous b) Arsenic c) Gallium ✓ d) Antimony	2 M	1		L1, L2
	<b>4b)</b> Derive an expression for current density in terms of conductivity and electric field.	8 M			L1, L2

		<b>PART-B-Answer any two full Questions</b>	<b>Marks</b>	<b>COs</b>	<b>BTL</b>
01.	<b>1a)</b> In an n-type material a) Holes are the minority carriers and electrons are the majority carriers ✓ b) Holes are the majority carriers and electrons are the minority carriers c) Both electrons are holes are the majority carriers d) Both electrons are holes are the minority carriers	2 M	1, 2		L1, L2
	<b>1b)</b> Define a PN junction. Describe the phenomenon of current flow at a junction. Compare various parameters of a junction under equilibrium condition, forward bias, and reverse bias.	8 M			L1, L2
02.	<b>2a)</b> A pentavalent impurity introduces an energy level near to the conduction band. This level is called _____ a) Acceptor level b) Donor level ✓ c) Defect state d) None of the above	2 M	1, 2		L1, L2

	2b) Estimate the approximate energy required to excite the fifth electron of a donor atom into the conduction band in a silicon atom. Use $\epsilon_r = 11.8$ for Silicon.	8 M		L1, L2
03.	3a) With respect to the impurity scattering, which of the following statement is true? a) As kinetic energy increases, the velocity of electrons increases, impurity scattering increases, and mobility increases. b) As kinetic energy increases, the velocity of electrons decreases, impurity scattering decreases, and mobility increases. c) As kinetic energy increases, the velocity of electrons increases, impurity scattering decreases, and mobility increases. ✓ d) As kinetic energy increases, the velocity of electrons increases, impurity scattering decreases, and mobility decreases.	2 M	1, 2	L1, L2
	3b) With the help of energy band diagram, <i>describe</i> in brief, the concept of Zener breakdown in a PN junction.	8 M		

CO1	Define the principles of semiconductor Physics
CO2	Outline the principles and characteristics of different types of semiconductor devices
CO3	Explain the fabrication process of semiconductor devices
CO4	Utilize the mathematical models of semiconductor junctions and MOS transistors for circuits and systems.

01.	a) 1. Which of the following is an Input device A. Joystick B. Keyboard C. Mouse D. All the above 2. RISC stand for A. Reduced Instruction Set Computer B. Reform Information Set Computer C. Rejoin Instruction Set Computer D. Roman Instruction Set Computer	2 M	1	L1
	b) <b>Explain</b> the following addressing modes with example: Immediate, base with index, relative & auto increment	8 M		L2
02.	a) 1. The Mainframe is called as Big Iron, True/False. A. True B. False 2. The data/operands are stored in _____ A. Memory B. Control Unit C. ALU D. Monitor	2 M	1	L1
	b) <b>Explain</b> with necessary block diagram the basic functional unit of a computer	8 M		L2
03.	a) 1. Which of the following is TRUE? A. The processor contains ALU, control-circuitry and many registers. B. The control-unit generates the timing-signals that determine when a given action is to take place A. The MAR holds the address of the memory-location to be accessed B. All of the above 2. _____ and _____ facilitates the communication with memory. A. IR & PC B. PC & ALU	2 M	1	L1

	C. MAR & MDR D. Control Unit & ALU			
	b) Mention four types of operations to be performed by instructions in a computer. <b>Explain</b> with basic types of instruction formats to carry out $C = [A] + [B]$ .	8 M		L2
04.	a) 1. A nibble is a group of ___ bits a. 16 b. 8 c. 4 d. 2 2. The _____ contains the data to be written into or read out of the addressed location a. IR b. PC c. MDR d. Control Unit	2 M	1	L1
	b) <b>Explain</b> the different types of a computer.	8 M		L2

	<b>PART-B-Answer any two full Questions</b>	<b>Marks</b>	<b>COs</b>	<b>BTL</b>
05	a) 1. The given syntax refers to _____ addressing mode (Ri, Rj) A. Immediate addressing mode B. Register C. Base with Index D. Base with Index and offset 2. _____ is a collection of programs that are executed as needed to perform functions such as functions such as A. Software B. Compiler C. Virus D. Device	2 M	1	L1
	b) With appropriate diagrams <b>Explain</b> the concept of straight line sequencing and looping	8 M		L2
06.	a) 1. ALU does perform A. Data Transfer B. Logic operation C. Arithmetic operation D. Both B & C 2. In Little-Endian assignment, lower byte-addresses are used for the less significant bytes of the word. True / False A. True B. False	2 M	1	
	b) <b>Explain</b> the basic input/output operation & memory mapped	8 M		L2

	operation with an example.			
07.	<p>a)</p> <p>1. Programs written in an assembly language can be automatically translated into a sequence of machine instructions by a program called an</p> <p>A. Assembler B. Source code C. Object code D. None of the above</p> <p>2. Add A,B, C performs :</p> <p>A. Add the contents of memory-locations A &amp; B. Then, place the result into location C. B. Add the contents of memory-locations A &amp; B. Then, place the result into location B C. Transfers the contents of memory-locations A to B. D. Copies the contents of memory-locations A to B. Then, place the Original data into location B.</p>	2 M	1	L1
	<p>b) Solve the following using 2s complement system.</p> <p>a. <math>8+(-4)</math> b. <math>(-4)-(-2)</math> c. <math>(+9)-(-3)</math> d. <math>(-2)-(-5)</math></p>	8 M		L3

CO1	Explain the basic organization of a computer system.
CO2	Explain different ways of accessing an input / output device including interrupts.
CO3	Illustrate the organization of different types of semiconductor and other secondary storage memories.

	<p>4) Output unit &amp; 5) Control unit</p>  <p><b>Figure 1.1</b> Basic functional units of a computer.</p> <p><b>Input Unit:</b> In computing, an input device is a piece of computer hardware equipment used to provide data and control signals to an information processing system such as a computer or information appliance. Examples of input devices include keyboards, mouse, scanners, digital cameras and joysticks.</p> <p><b>Memory Unit:</b> Memory unit is a component of a computer system. It is used to store data, instructions and information. It is actually a work area of computer, where the CPU stores the data and instruction. It is also known as a main/primary/internal memory. There are two types of memory: -</p> <ol style="list-style-type: none"> <li>1. Read only memory (ROM):- ROM is a part of the memory unit. This is read only memory. It cannot be used to written. ROM is used in situations where the data must be held permanently.</li> <li>2. Random access memory (RAM):- RAM is also part of memory unit. It is used for temporary storage of program data. Its data is lost when power is turned off.</li> </ol> <p><b>ALU:</b> An arithmetic-logic unit (ALU) is the part of a computer processor (CPU) that carries out arithmetic and logic operations on the operands in computer instruction words. In some processors, the ALU is divided into two units, an arithmetic unit (AU) and a logic unit (LU).</p>

Question No.	Solution	Marks Allotted	Mapped COs	Bloom's Taxonomy level
	<p>b)</p> <p>Computers can be broadly classified by their speed and computing power.</p> <p>1. PC (Personal Computer): It is a single user computer system having moderately powerful microprocessor. A PC can be defined as a small, relatively inexpensive computer designed for an individual user. PCs are based on the microprocessor technology that enables manufacturers to put an entire CPU on one chip. Businesses use personal computers for word processing, accounting, desktop publishing, and for running spreadsheet and database management applications. At home, the most popular use for personal computers is playing games and surfing the Internet.</p> <p>2. Workstation: It is also a single user computer system, similar to personal computer however a more powerful microprocessor has. Workstation is a computer used for engineering applications (CAD/CAM), desktop publishing, software development, and other such types of applications which require a moderate amount of computing power and relatively high quality graphics capabilities.</p> <p>Workstations generally come with a large, high-resolution graphics screen, large amount of RAM, inbuilt network support, and a graphical user interface. Most workstations also have mass storage device such as a disk drive, but a special type of workstation, called diskless workstation, comes without a disk drive.</p> <p>Common operating systems for workstations are UNIX and Windows NT. Like PC, workstations are also single-user computers like PC but are typically linked together to form a local-area network, although they can also be used as stand-alone systems.</p> <p>3. Mini Computer: It is a multi-user computer system, capable of supporting hundreds of users simultaneously. It is a midsize multi-processing system capable of supporting up to 250 users simultaneously</p> <p>4. Main Frame: It is a multi-user computer system, capable of supporting hundreds of users simultaneously. Software technology is different from minicomputer. Mainframe is very large in size and is an expensive computer capable of supporting hundreds or even thousands of users simultaneously. Mainframe executes many programs concurrently and supports much simultaneous execution of programs.</p>	8

## **ONLINE TEST PROCESS**

## Academic Year 2020-21 (Even Semester)

Due to COVID pandemic the internal assessment during the academic 2020-21 Even Semester was conducted in **ONLINE MODE using Microsoft Teams Platform**. The IA process for the same is as follows:

1. The test schedule was intimated to both faculty and students.
2. The question paper scrutiny was done as earlier.
3. The test was conducted through MS Teams.
4. Each Invigilator was allotted with maximum of 20 students to monitor.
5. Invigilators have to create a separate channel and the allotted students have to join the respective channel.
6. Question Papers were posted in MS Teams at the start of the test.
7. Students were instructed to turn on the video for complete duration of the test without fail.
8. The test invigilation was recorded by each invigilator.
9. Also, the test was monitored by the Head of the Department, Dean(Academics) and Online IA Squad Committee.
10. After completion students were instructed to upload the scripts in the MS Teams only with the file name as **USN\_Name**.

## IA Circular

Date: 02/07/2021

**IA CIRCULAR**

This is to inform all the students of 8<sup>th</sup> semester that Second Online Internal Assessment for Even semester 2020-21 is scheduled from 05<sup>th</sup> July 2021 till 07<sup>th</sup> July 2021. The Time Table is attached for your reference. The platform is MS Teams. The student should login to the channel, 10 minutes before the commencement of test and adhere to the instructions provided by the invigilators.

**Examination Committee**

**HOD**

Date: 17/07/2021

**IA CIRCULAR**

This is to inform all that the Second Online Internal Assessment for Even semester 2020-21 for 4<sup>th</sup> and 6<sup>th</sup> Semester is scheduled from 22<sup>nd</sup> July 2021 till 24<sup>th</sup> July 2021. The faculty members handling subjects for 4<sup>th</sup> and 6<sup>th</sup> Semester are here by informed to set internal assessment question papers and mail the same to [eceiaqpatmece@gmail.com](mailto:eceiaqpatmece@gmail.com) on or before 21<sup>st</sup> July 2021. The guideline to set question paper is as follows

1. The faculty should prepare 2 different sets of question paper for respective subjects without any repetitions and should be same for both the sections.
2. The question paper pattern and time table are attached for your reference.
3. The Head of the Department will select any one among 2 sets of question paper and the same will be issued during the internal assessment.

<b>COURSE</b>	:	<b>Control System</b>	<b>TIME</b>	:	<b>10AM-11:30AM</b>
<b>COURSE CODE</b>	:	<b>18EC43</b>	<b>DATE</b>	:	<b>30-7-2021</b>
<b>SEM/SEC</b>	:	<b>IV Sem A/B</b>	<b>MAX. MARKS</b>	:	<b>50</b>

<b>PART-A-Answer any three full Questions</b>		<b>Marks</b>	<b>COs</b>	<b>BTL</b>
01.	A). A node having only outgoing branches. a) Input node b) Output node c) Incoming node d) Outgoing node	2 M	CO1	L1
	B). Find $C(s)/R(s)$ using Mason's Gain Formula. 	8 M		L1, L2, L3
02.	A). Loop which do not possess any common node are said to be _____ loops. a) Forward gain b) Touching loops c) Non touching loops d) Feedback gain	2 M	CO1	L1
	B) Find $I_o(s)/V_i(s)$ using Mason's Gain Formula. 	8 M		L1, L2, L3
03.	A). Signal flow graphs: a) They apply to linear systems b) The equation obtained may or may not be in the form of cause or effect c) Arrows are not important in the graph d) They cannot be converted back to block diagram	2 M	CO1	L1
	B) Find $Y/Y_1$ using Mason's Gain Formula 	8 M		L1, L2, L3
04.	A). The relationship between an input and output variable of a signal flow graph is given by the net gain between the input and output node is known as the overall _____ a) Overall gain of the system b) Stability c) Bandwidth d) Speed	2 M	CO1	L1

	<p>B) Find <math>C(s)/R(s)</math> using Mason's Gain Formula.</p>	8 M		L1, L2, L3
--	---	-----	--	---------------

<b>PART-B-Answer any two full Questions</b>		<b>Marks</b>	<b>COs</b>	<b>BTL</b>
05.	A) .Benefits of feedback: a) Performance of system is greater. b) Need for system much larger path gain and system instability. c) Controlled variable accurately follows the desired value d) Affected by parameter variations	2 M	CO1, CO2	L1
	B) For $G(s)H(s)=K(S+2)/S(S+4)(S^2+2S+2)$ ,Calculate angles of departure at complex conjugate poles.	8 M		L1, L2, L3
06.	A) .Effect of feedback on sensitivity is minimum in: a) Open loop control system b) Closed loop control system c) None of the mentioned d) Both of the mentioned	2 M	CO1, CO2	L1
	B) Write the general steps to solve the problem on Root Locus.	8 M		L1,L2
07.	A) .Feedback control systems are: a) Insensitive to both forward and feedback path parameter changes b) Less sensitive to feedback path parameter changes than to forward path parameter changes c) Less sensitive to forward path parameter changes that to feedback path parameter changes d) Equally sensitive to forward feedback path parameter changes	2 M	CO1, CO2	L1
	B) For $G(s)H(s)=K/S(S+1)(S+4)$ ,determine the co-ordinates of valid Breakaway points.	8 M		L1, L2

<b>CO1</b>	Develop the mathematical model of mechanical and electrical systems and to obtain the transfer function using block diagram reduction rules and mason's gain formula
<b>CO2</b>	Understand time domain specifications for first and second order systems
<b>CO3</b>	Determine the stability of a system in the time domain using Route Hurwitz criteria and root locus technique in the frequency domain using Nyquist and bode plots.
<b>CO4</b>	Model a control system in continuous and discrete time using state variable techniques

<b>Bloom's Taxonomy Level</b>	
<b>L1</b>	<b>Remembering</b>
<b>L2</b>	<b>Understanding</b>
<b>L3</b>	<b>Applying</b>
<b>L4</b>	<b>Analyzing</b>
<b>L5</b>	<b>Evaluating</b>
<b>L6</b>	<b>Creating</b>

**SCHEME AND SOLUTION**

Subject Title: Control system

Subject Code: 18EC43

CO1	Develop mathematical model of mechanical & electrical system
CO2	Understand time domain specifications
CO3	Determine the stability of a system in time domain.
CO4	Model a CS in continuous & discrete time using state
<del>CO5</del>	variable technique.
<del>CO6</del>

## DEPARTMENT OF CIVIL ENGINEERING

**Mechanism of internal assessment is transparent and robust in terms of frequency and mode**

The Department conducts three internal assessment tests at approximately 6th, 12th and 14th week respectively. The faculties are informed about the test schedule and instructed to set two sets of Question paper. HOD will select the Question paper and for that scheme of valuation will be written by the faculty

Each test is intended to cover approximately one third of the syllabus. On completion of the Valuation, Scheme of valuation is discussed and Results are announced by Faculty members in their class session. The IA Test marks is uploaded in AIMS portal

# ONLINE TEST PROCESS

### **AY:2020-21**

During the pandemic steps was taken to keep the Test process robust are as follows

1. Test Schedule announcement to students through circular
2. Test paper was deployed using MS Team Form/ Channel created by faculty for each individual subjects
3. Students entered their Name, USN, Signature in every sheet and uploaded the Test script in the submission form provided

## DEPARTMENT OF CIVIL ENGINEERING

INTERNAL ASSESSMENT-02  
ADVANCED SURVEYING

Part - A

1. a. i. (a) Linear method  
ii (a) By CURVES

b.  $R = 300m, \Delta = 60^\circ$

(a) Arc definition:  $s = 300m$   
 $D = \frac{180}{R} \times \frac{s}{\Delta} = \frac{180}{300} \times \frac{300}{60} = 5.73m$

(b) Chord definition:  
 $D = \frac{2 \times 180}{R} \times \frac{s}{\Delta} \times \frac{1}{2} = \frac{2 \times 180}{300} \times \frac{300}{60} \times \frac{1}{2} = 5.73m$

(i) Length of the curve:-  
 $L = \frac{\pi R \Delta}{180} = \frac{\pi \times 300 \times 60}{180} = 314.16m$

(ii) Tangent length:-  
 $T = R \tan \frac{\Delta}{2} = 300 \tan \frac{60}{2} = 173.21m$

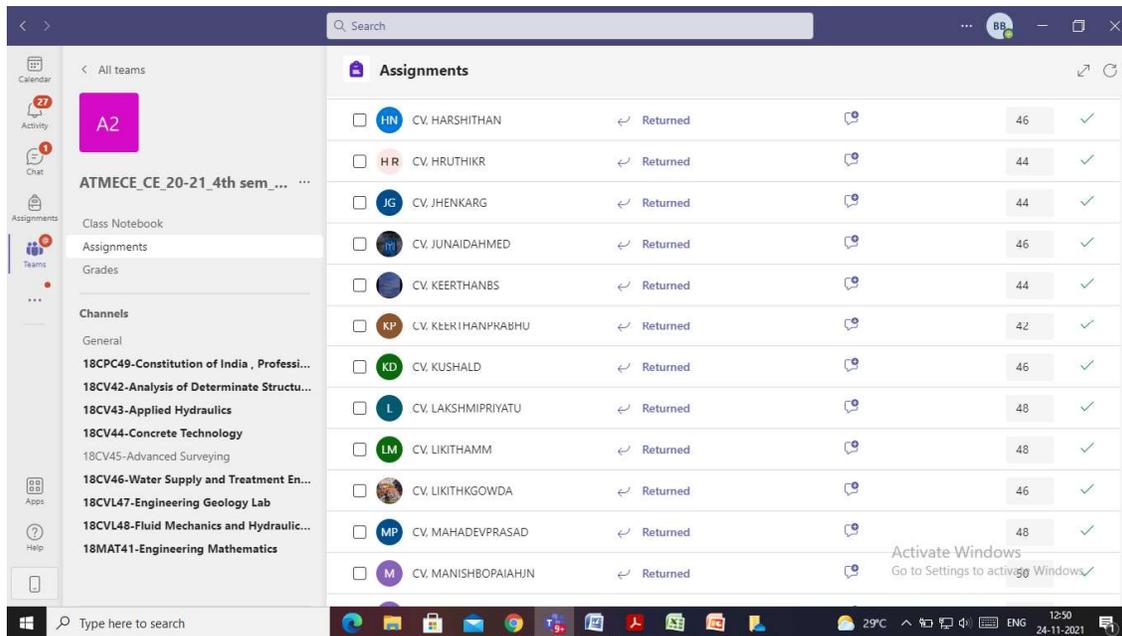

(iii) Length of long chord:-  
 $L_c = 2R \sin \frac{\Delta}{2} = 2 \times 300 \sin \frac{60}{2} = 300m$

(iv) Mid-ordinate:-  
 $M = R \left(1 - \cos \frac{\Delta}{2}\right) = 300 \left(1 - \cos \frac{60}{2}\right) = 40.19m$

(v) A pie of 2 horses:-  
 $P = R \left(\Delta \frac{\pi}{180} - \sin \frac{\Delta}{2}\right) = 300 \left(\Delta \frac{\pi}{180} - \sin \frac{\Delta}{2}\right) = 6.92m$

SUB CODE	1	18CV34	TIME	1	10am to 11:30am
SUBJECT	1	Building Materials & Construction	DATE	1	09/10/2020
SEM/SEC	1	3 <sup>rd</sup> Sem/A sec	MAX. MARKS	1	50

		PART-A-Answer any three full Questions	Marks	COs	BTL
01	a)	Answer the following multiple choice questions and each carries 1 mark i. For a good building stone how much is the required crushing strength? a) Less than 50 N/mm <sup>2</sup> b) Greater than 100 N/mm <sup>2</sup> c) 155 N/mm <sup>2</sup> d) 10 N/mm <sup>2</sup>	2 M	1	L1
	ii.	A 1st class brick immersed in water for 24 hours, should not absorb water (by weight) more than a) 10%                                        b) 15% c) 20%                                        d) 25%			L1
		b) Explain any Eight requirements of good building stones	8 M		L2
02	a)	Answer the following multiple choice questions and each carries 1 mark i. What is the required specific gravity for a good building stone? a) Greater than 2.7                        b) Less than 3 c) Greater than 3                         d) Less than 2.7	2 M	1	L1
	ii.	What should be observed ideally when two bricks are struck together? a) Dull sound                                b) Sides shatter c) Clear ringing sound                    d) Brick breaks			L1
		b) Describe the manufacturing process of Brick in details	8 M		L2
03	a)	Answer the following multiple choice questions and each carries 1 mark i. Light weight mortar is prepared by using a) Lime                                        b) Sunkia c) Wood chips                                d) Flyash	2 M	1	L1
	ii.	What is the size of fine aggregates? a) 4.75mm                                    b) < 4.75mm c) > 4.75mm                                d) 12mm			L1
		b) Explain the classification of mortar based on binding materials	8 M		L2
04	a)	Answer the following multiple choice questions and each carries 1 mark i. Packing mortars are used to pack a) Oil wells                                    b) Retaining walls c) Bricks                                        d) Cracks in masonry	2 M	1	L1
	ii.	What is the fineness modulus value of a fine sand? a) < 2.2                                        b) 2.2-2.6 c) < 1    d) 1-2			L1
		b) Describe the method of determining specific gravity and bulking of fine aggregate	8 M		L2

		PART-B-Answer any two full Questions	Marks	COs	BTL
01	a)	Answer the following multiple choice questions and each carries 1 mark i. The type of boring, used for making deep excavations is a) Cylindrical augers                        b) Percussion boring c) Rotary boring                             d) Wash boring	2 M	2	L1
	ii.	When two column loads are unequal, which of the possible footing can be provided a) Strap footing                             b) Raft footing c) Trapezoidal combined footing      d) Mat footing			L1
		b) Explain any four methods of Site exploration in details with a neat sketch	8 M		L2
02	a)	Answer the following multiple choice questions and each carries 1 mark i. The plate load test is essentially a a) Laboratory test                         b) Field test c) Graphical method analysis          d) None of the above	2 M	2	L1

## DEPARTMENT OF CIVIL ENGINEERING

	ii. The part of a building constructed below ground level is known as: a) Plinth b) Superstructure c) Basement d) Foundation	8 M		L2
	b) Describe the method of loading test for determining the SBC of soil with a neat sketch	8 M		L2
03	a) Answer the following multiple choice questions and each carries 1 mark i. The foundations are placed below ground level to increase: a) Strength b) Workability c) Stability of structure d) All the above. ii. Which of the below is not a preliminary consideration for building a foundation? a) Bearing capacity of soil b) Ground water condition c) Settlement control d) Soil organisms	2 M	2	L1
	b) Explain Isolated column footing and Combined footing in detail with a neat sketch	8 M		L2

CO1	Select suitable materials for buildings and adopt suitable construction techniques.
CO2	Decide suitable type of foundation based on soil parameters.
CO3	Supervise the construction of different building elements based on suitability.
CO4	Exhibit the knowledge of building finishes and form work requirements.

Bloom's Taxonomy Level

## Department of Computer Science and Engineering

---

### **2.5 Evaluation Process and Reforms**

#### **Continuous Internal Evaluation (CIE) System**

---

## Department of Computer Science and Engineering

---

### **Mechanism of internal assessment is transparent and robust in terms of frequency and mode**

The Department conducts three internal assessment tests at approximately 6 th, 12th and 14th week respectively.

- In 2017 scheme and 2018 schemes of VTU under CBCS, the weightage on Continuous Internal Evaluation (CIE) and Semester End Exams (SEE) is assigned as 40:60 ratios. The CIE is to be evaluated for 40 marks, in which CIE Test carries 30 marks and the remaining 10 marks will be awarded based on other parameters like assignments, quizzes, class tests etc as stipulated by VTU Regulation 18OB8.2.
- In a semester, three CIE Tests i.e. Test-1, Test-2 and Test-3 will be conducted for 50 marks each and average of three tests will be reduced to 30 marks to consider it as final CIE component.
- Test papers are set, evaluated and assessed by course teachers and the marks so obtained are share with students.
- Process for setting/selection of the question paper:
  - a. For each CIE Test, Minimum 02 sets of question papers shall be set for each course by the respective course teacher(s) along with scheme of evaluation and solution. The portions/syllabus to be covered will be decided at the beginning of the semester for the First test, and similarly the portion for the Second and Third Internal tests soon after the completion of Test-1 and Test-2 respectively.

---

## Department of Computer Science and Engineering

---

- b. HOD will pick 01 set and hand over to Test coordinator for printing. The Department EMS coordinator has to submit the selected question paper with scheme (approved by HOD) in sealed cover to the COE before three days of the commencement of the Internals Assessment. The EMS coordinator will further assist the exam cell for taking care of number of copies to be printed and the distribution to the allotted rooms.
- c. While setting the question paper the course coordinator should take care to cover all COs and the RBT levels up to level-3 at least.
- Seating plan and table marking is followed even for internal assessment tests and it is displayed on the notice board along with the internal assessment time table.
  - Immediately after the test, the course coordinator shall discuss the test paper in the class. The scheme and solution of the course to be evaluated is required to be displayed for student's notice.
  - The evaluated blue books shall be made available to students to enable students to gauge their performance in the test.
  - The marks to be updated if any changes. If there is a grievance from the student with regard to the marks awarded, the HOD can get it verified/valued by the second/subject expert to guarantee the justice. A final mark of each test is finally entered to AIMS for further needful.
  - Within one week of completion of CIE Test, the Department Test Coordinators has to submit the CIE marks along with CIE Result Analysis to COE.

# **SAMPLE TEST PROCESS: 2020-2021**

---

## Department of Computer Science and Engineering

---

**During the pandemic, IA Test was conducted through virtual platform in Microsoft Teams**

### **AY: 2020-2021 [Odd and Even Semester]**

During the pandemic special care was taken to keep the Test process robust.

Invigilators were allotted who monitored the entire process of test conduction.

1. Test Schedule announcement to students through circular
2. Scrutiny of IA-QP as previously followed.
3. Student Group allotment in the Microsoft Teams channel.
4. Invigilators allotment in MS Team Group
5. During the entire Test process, Students have to keep the camera on.
6. Test paper will be deployed in MS Teams Channel using MS Teams Form
7. Test process was video documented and monitored by Invigilator with the assistance of Test coordinator. Dean Academics, Head of the Department, Test coordinator monitored the process by visiting all the MS Teams channels. Instructors were allotted in every group to monitor any technical issues
8. Students entered Name, USN, Signature in every sheet and uploaded the Test script in the submission form provided.

**SCHEME AND SOLUTION**  
**ACADEMIC YEAR 2020-2021 (ODD SEM)**  
**INTERNAL ASSESSMENT - I**

Subject: Machine Learning

Subject Code: 17CS73 Sem: 7 A

CO1	Understand Machine learning and problems that can be handled by ML
CO2	Outline the concepts of Decision Tree learning
CO3	Illustrate Artificial Neural Networks and its issues
CO4	Analyze theory of probability & Statistics related to Bayes Classifier, Bayesian Belief Networks, etc.
CO5	Explain/Evaluate instance based and reinforcement learning algorithms and compare learning algorithms.

Bloom's Taxonomy Levels

L1: Remembering L2: Understanding L3: Applying L4: Analyzing L5: Evaluating L6: Creating

Question No	Solution	Marks Allotted	Mapped CO's	BTL
1a)	i) ALL of the Above ii) Traditional programming.	2m		1
1b)	steps involved in Designing a Learning system. a) choosing the training experience. b) choosing the target function. c) choosing a representation for the target function. d) choosing the function approximation algorithm. e) final design.		1	
	a) <u>choosing the training experience</u> • This type of training experience will decide on success or failure of the learner. • <u>First key attribute</u> is whether the training experience provides direct or indirect feedback.			

Department of Computer Science and Engineering

Question No	Solution	Marks Allotted	Mapped CO's	BTL
	<p>• <u>Direct</u>: Individual checkers board states and correct move for each.</p> <p>• <u>Indirect</u>: Final out comes for games played.</p> <p>• <u>Credit assignment</u>: Determines the degree to which each move in the sequence deserve credit</p> <p><u>Second attribute</u> of the training example is learner controlling the sequence of training examples.</p> <p>(a) Learner waits for teacher            (b) Learner asks the teacher            (c) Learner learns itself with no teacher</p> <p><u>Third attribute</u>. How well the distribution of examples is made, how is the performance measured over this.</p> <p>checkers game { Performance <math>P</math>: Percent of games system wins.            Experience <math>E</math>: games played to itself</p> <p><u>Choosing target experience</u>.</p> <p>• The next design choice is to determine exactly what type of knowledge will be learned and how this will be used by the performance program.</p>	2m		

Department of Computer Science and Engineering

Question No	Solution	Marks Allotted	Mapped CO's	BTL
	<p><u>In checkers program.</u></p> <p>1) Let us begin with a checkers playing program that can generate the legal moves from any board state</p> <p>2) The program needs only to learn how to choose the best move from these legal move.</p> <p>3) Choosing a best move, for any given board state.</p> <p>4) choose move.</p> <p>5) choose move <math>B \rightarrow M</math> to indicate that this function accepts as input any board from the set of legal board states <math>B</math> and produces as output some move from set of legal move <math>m</math>.</p> <p>6) <u>An alternative target function</u> is the evolution that assigns a numerical score to any given board state</p> <p>target function <math>V \rightarrow B \rightarrow R</math>  <math>V</math> maps any legal board state from the set <math>B</math> to some real value</p> <p>7) <u>Choosing Representation of target function</u></p> <p><u>let us choose a simple representation</u></p> <p>For any given board state, function <math>V</math> will be calculated as Linear combination.</p>	2m

# ASSIGNMENT

---

## Department of Computer Science and Engineering

---

**AY: 2020-2021**

The Department follows the following components for the evaluation of **Assignments (10 Marks/Course)**.

The components below can be considered for 6Marks under Component A. Remaining 4 marks is assigned for skill enhancement through MOOC Certification under Component B

### Component A: Assignment

1. Quiz on the topics relevant to the syllabus or beyond syllabus. (Weightage of 6 Marks)

### Component B: MOOC Certification

- For registration of the course (Weightage of 2 Marks)
- Completion of the course (Weightage of 2 Marks)

**Mechanism of internal assessment is transparent and robust in terms of frequency and mode**

The Department conducts **three internal assessment tests** at approximately 6th, 12th and 14th week respectively. The faculties are informed on the test schedule, question paper review date and reviewers. The evaluation scheme and solutions during question paper review are to be present during the meeting with the reviewers.

The question paper, solutions and the evaluation scheme are reviewed and corrections are offered by the reviewers before the final approval by the Head and reviewers allotted to the respective courses. From AY:2020-2021 Vertical Heads are assigned course QP review. Each test is intended to cover approximately one third of the syllabus. On completion of the Valuation, Scheme of valuation is discussed and Results are announced by Faculty members in their class session. The IA Test marks are uploaded in CERP portal.

Date: 14/10/2019

### Circular

All the Staff members of the Department are here by informed to prepare **Two sets** of question papers of their respective subjects for the **Second-Internal Assessment** and the same has to be submitted to HOD before **17-10-2019**. HOD will select one question paper and faculty has to prepare detailed scheme for the selected question paper after the test. Later question paper and detailed scheme are to be submitted to the test committee.

The following faculty members are identified as stream wise subject experts for the academic year 2019-20 to scrutinize the question papers to validate **CO mapping, blooms Taxonomy Level, syllabus and marks allotted.**

- 1) Design Stream Subjects : Mr.Suresh Kumar S
- 2) Thermal Stream Subjects : Mr.Ravikumar S
- 3) Manufacturing Subjects : Mr. Devaraj M R
- 4) Management : Mr. Niranjan Kumar V S

### Odd Semester Subjects

Design Stream Subjects	Thermal Stream Subjects	Manufacturing Subjects	Management and Automation
18ME34 Mechanics of Materials	18ME33 Basic Thermodynamics	18ME34 Material Science	17ME51 Management and Engineering Economics
17ME52 Dynamics of Machinery	17ME52 Energy and Environment	18ME35A Metal Cutting & Forming	15ME753 Mechatronics
17ME54 Design of Machine Elements-I	17ME53 Turbo Machines	18ME35B Meta casting & Welding	
15ME73 Control Engineering	15ME71 Energy Engineering	18ME36B Mechanical Measurements & Metrology	
15ME742 Tribology	15ME72 Fluid Power Systems	17ME554 Non Traditional Machining

**SECOND INTERNAL ASSESMENT**

<b>SUB CODE</b>	: 17ME52	<b>TIME:</b> 9.30 AM-11.00 AM
<b>SUBJECT</b>	: Dynamics of Machinery	<b>DATE:</b> 18-10-2019
<b>SEM</b>	: 5 <sup>th</sup> Sem	<b>MAX. MARKS:</b> 30

	<b>PART-A</b> Answer any two Questions (12 MARKS EACH)	CO's	Bloom's Taxonomy Level
01.	A four wheel trolley car of total mass 3000Kg. Each axle with its two wheels and gears has total Moment of inertia $M_I$ $32\text{Kg-m}^2$ . Each wheel is of 450mm radius. The centre distance between two wheels is 1.4m. Each axle is driven by a motor with speed ratio of 3:1. Each motor along with its gear has a moment of Inertia $16\text{Kg-m}^2$ and rotates in the opposite direction to that of axle. The center of mass of the car is 1m above the rails. Determine the limiting speed of the car when it has to travel around a curve of 250m radius with out the wheels leaving the rails.	3	L 5
02.	The rotor of the turbine of a ship has a mass of 2500kg and rotates at a speed of 3200rpm counter clockwise viewed from aft(rear). The rotor has radius of gyration of 0.4m. Determine the gyroscopic couple and its effect when, i) steers to the left in a curve of 80m radius at a speed of 15 knots ii) The ship pitches $\pm 5$ degrees up and down with bow descending with time period 40 seconds. (1Knot=1860M/hr)	3	L 5
03	Add the SHM analytically and Analyze it by Graphically. $X_1 = 2 \cos(\omega t + 0.5)$ $X_2 = 5 \sin(\omega t + 1.0)$	4	L 4
<b>PART B-Answer any one Questions (6 MARKS)</b>			
04	Explain the effect of gyroscopic couple on naval ship.	3	L 2
05	List and Explain Different Types of Vibrations.	4	L 2

<b>CO 1</b>	Determine the forces and couples for static and dynamic conditions of four bar and slider crank mechanisms to keep the system in equilibrium.
<b>CO 2</b>	Analyze static and Dynamic balancing for Rotating and Reciprocating masses.
<b>CO 3</b>	Determine equilibrium speed, sensitiveness, isochronism, effort and power of porter and hartnell governors. Also gyroscopic couple and effects related to 2, 4 wheeler, plane disc, ship and aero planes.
<b>CO 4</b>	Understand types of vibration, equation of motion and determine frequency and its behavior of Single degree Damped, Undamped and Forced Vibrations.

Bloom's Taxonomy Level	
L1	Remembering
L2	Understanding
L3	Applying
L4	Analyzing
L5	Synthesizing
L6	Evaluating

# ONLINE TEST PROCESS

## **AY: 2019-2020 [Even Semester]**

During the pandemic special care was taken to keep the Test process robust. Invigilators were allotted to monitor the entire process of test conduction.

1. Test Schedule was announced to students through circular
2. Scrutiny of papers was carried out as previously followed.
3. Student Group allotment was carried in the Microsoft Teams channel.
4. Invigilators allotment in MS Team Group
5. During the entire Test process, Students had to switch on their camera.
6. Test paper was deployed using MS Team Form/ Channel.
7. Test process video was documented and monitored by Invigilator with the assistance of Test coordinator. Head of the Department monitored the process by visiting all the MS Teams channels.
8. Students will enter their Name, USN, and Signature in every sheet and they will upload scanned copy of answer scripts to MS teams.

## D. Test Paper deployment and submission form in MS Teams

The screenshot displays the MS Teams interface. The top section shows a grid of team cards under the heading "Your teams". The teams listed are:

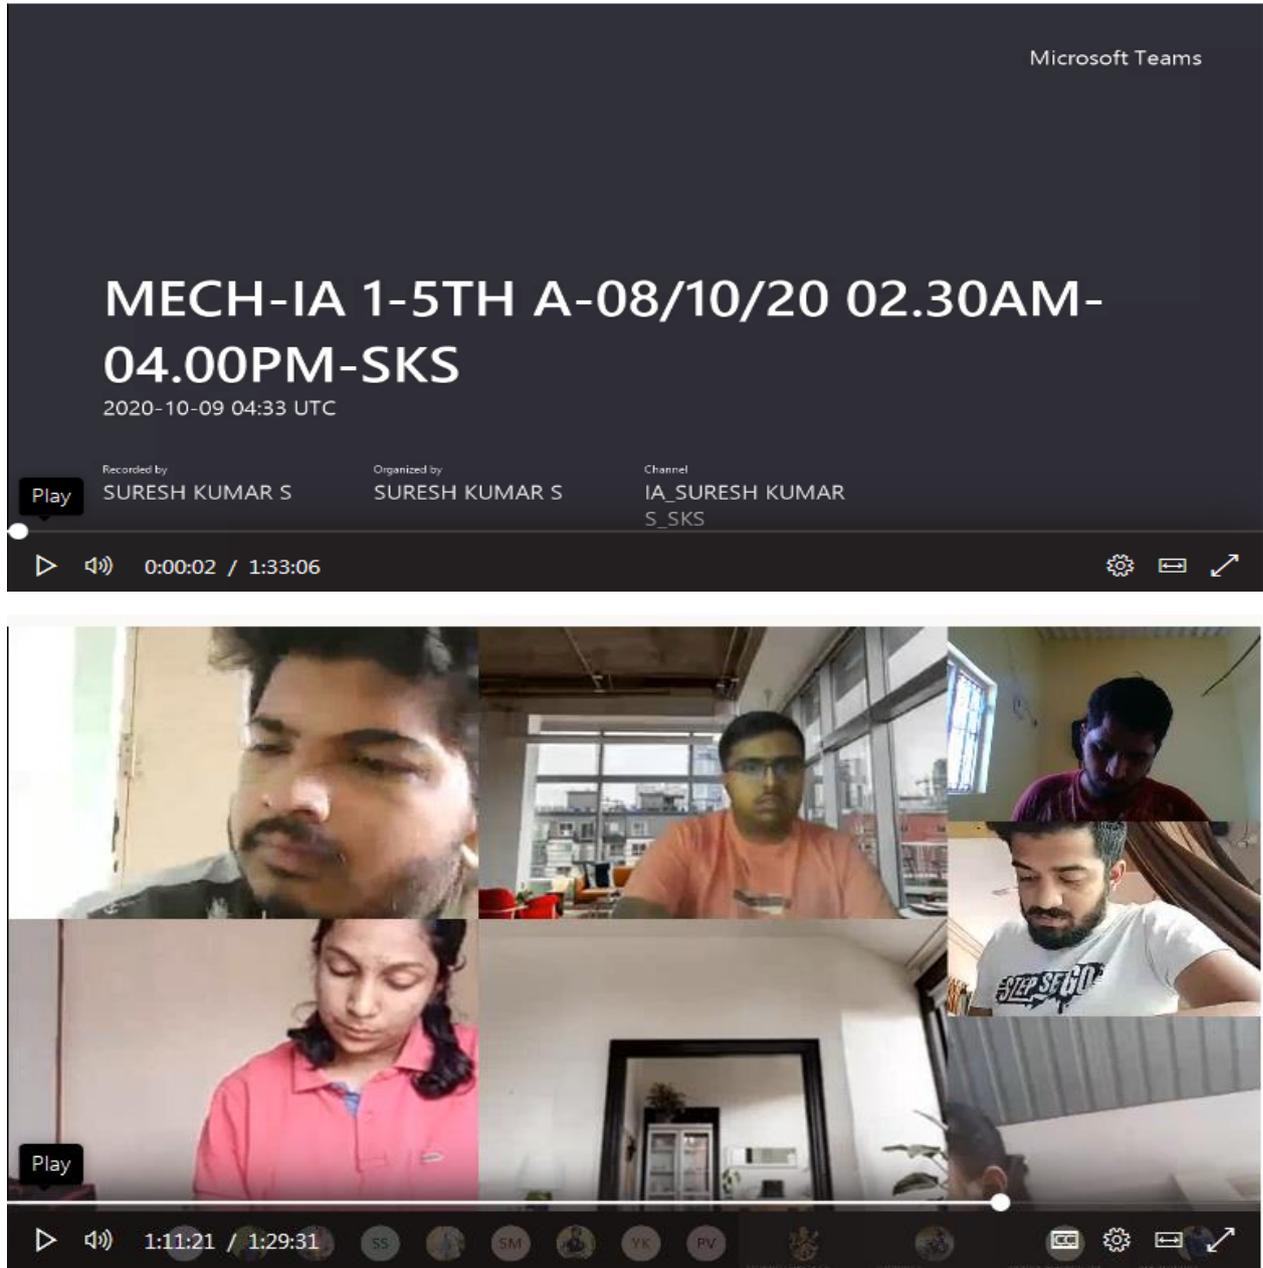

- 6A (2019-20) ME - 6th Sem A Sec
- ATME\_ME\_4th B (2019-20)
- ATME\_ME\_Mechanical Staff
- ATME\_ME\_Project, Seminar and...
- ATME\_ME\_4th A, B & C (2019-20)
- ATME\_ME\_Department Activities (2020-21)
- ATME\_ME\_6th A (2020-21) [Old]
- ATME\_ME\_Internal Assessment (2020-21)

The bottom section shows a channel view for the "ATME\_ME\_4th B (2019-20)" team. The channel is named "General" and contains the following assignments:

- CAMD Assignment - 2**: Due May 05, updated 22-Apr-20 5:50 PM. 3 replies from Assignments.
- KINEMATICS OF MACHINERY FIRST TEST**: Due May 05, updated 05-May-20 9:30 AM.
- Assignment -1**: Due May 05, updated 05-May-20 1:16 PM.

# ASSIGNMENT

## **ODD Semester: 2019-2020**

The Department follows the following components for the evaluation of **Assignments (10 Marks/Course)**.

1. Solving the VTU question papers and other important questions.
2. Quiz on the topics relevant to the syllabus.

Based on the above components assignment marks will be finalized.

## **Even Semester: 2019-2020**

In the Even semester revision in the policy was adopted. Any two components below can be considered for 6 Marks. Remaining 4 marks is assigned for skill enhancement through MOOC Certification.

1. Solving the VTU question papers and other important questions.
2. Quiz on the topics relevant to the syllabus.

### MOOC Certification

- For registration of the course (Weightage of 2 Marks)
- Completion of the course (Weightage of 2 Marks)

## Quiz on the topics relevant to the syllabus

Course: Fluid Power System

Course Code: 15ME72

### Sample Quiz

Solving the VTU question papers and other important questions

D) Scale (1:5)

Step 1: Neglect force Q = 800 N Consider P = 2000 N

Free body diagram

Link 2

Link 3

Link 4

Force polygon (1:4)

$ab = F_{34} = 2120 \text{ N}$   
 $bo = F_{14} = 760 \text{ N}$

Link 3

$F_{13} = F_{34} = 2120 \text{ N}$   
 $F_{43} = F_{33} = 2120 \text{ N}$

Link 2

Scale (1:5)

$h = 5.5 \times 5 = 27.5 \text{ cm}$   
 $T = F_{32} \times h = 583 \times 27.5 = 16032.5 \text{ N}\cdot\text{cm}$   
 $T = 16032.5 \times 10^{-3} = 16.0325 \text{ Nm}$   
 ~~$T = 583 \text{ Nm}$~~

Step 2: Neglect force P = 2000 N Consider

Sample Assignment

Q1) Effect of gyroscopic couple on naval ship

- (a) Steering
- (b) Pitching
- (c) Rolling

Steering  
Case i:

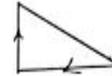

When Viewed from Stern/Stern

front end of the ship is called Bow  
rear end of the ship is called stern  
Right side of the ship is called Starboard  
Left side of the ship is called port.

Case i'  
When viewed from rear and ship is not taking  
turn, the engine propeller is rotating in clock  
effect of gyroscopic couple will tend to raise the  
bow and dip the stern.

Case 4

When engine propeller is rotating in counter clock  
wise and the ship takes right turn when viewed  
from rear  
- the effect of gyroscopic couple will tend to raise the  
stern and dip the bow.

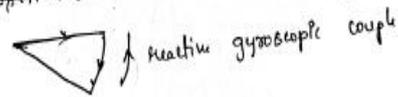

Pitching

the movement of ship either ~~up~~ upwards or down  
wards is called pitching.

Case i

if the ship moves upward when viewed from rear  
the ~~prop~~ effect of gyroscopic couple in pitching  
will tend to move the starboard ~~to~~ right  
position side  
propeller towards

Case ii

if the ship moves downward when viewed from rear  
the effect of gyroscopic couple in pitching will  
tend to move the propeller towards port

## IA Process Timetable

**Department of Basic Sciences and Humanities**

Date: 25/01/2021

### Circular

The first Internal assessment is scheduled as per Academic calendar 2021. The timetable for the respective IA is as follows,

<u>First Internal Assessment Time Table</u>			
Date	Time	Physics Cycle	Chemistry Cycle
30-01-2021 Saturday	9:30 am to 11:00 am	18PHY12	18CHE12
	3:00 pm to 4:30 pm	18MAT11	
01-02-2021 Monday	9:30 am to 11:00 am	18ELE13	18ELN14
	3:00 pm to 4:30 pm	18CIV14	18CPS13
02/02/2021 Tuesday	9:30 am to 11:00 am	**	18ME15
	2.00 pm – 3.00 pm	18EGH18	

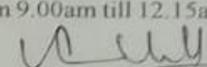

The same has been notified at Chemistry and Physics department Notice board. In this regard, it is informed to the students to bring Bluebooks directly to their allotted rooms on the day of first IA.

\*\* P-Cycle students will have to attend EGDL classes on 02/02/2021 from 9.00am till 12.15am.

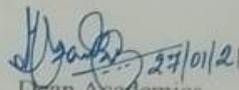

Forwarded to Dean Academics for further necessary action

**Department of Mathematics**

	<p>a) Lagrange's equation c) Bernoulli's equation</p> <p>b) Cauchy's equation d) Legendre's equation</p>			
	<p>b) Solve <math>y'' + y = \frac{1}{1+\sin x}</math> by the method of variation of parameters</p>	8 M		
04.	<p>a) i) The roots of the homogeneous differential equation <math>\frac{d^2y}{dx^2} - 10\frac{dy}{dx} + 25y = 0</math> is</p> <p>a) unique c) complex</p> <p>b) repeated d) none of these</p> <p>ii) If the roots of the A.E is <math>2 \pm 3i, 2 \pm 3i</math> then the complementary function is</p> <p>a) <math>e^{2x}(c_1 \cos 3x + c_2 \sin 3x)</math> b) <math>e^{3x}(c_1 \sin 2x + c_2 \cos 2x)</math> c) <math>e^{2x}[(c_1 + c_2x)\cos 3x + (c_3 + c_4x)\sin 3x]</math> d) <math>e^{3x}[(c_1 + c_2x)\cos 2x + (c_3 + c_4x)\sin 2x]</math></p>	2 M	2	L2
	<p>b) Solve <math>(3x + 2)^2 \frac{d^2y}{dx^2} + 3(3x + 2) \frac{dy}{dx} - 36y = x^2 + x + 1</math></p>	8 M		
	<p><b>PART-B</b> Answer any TWO full Questions</p>	<b>Marks</b>	<b>COs</b>	<b>BTL</b>
05.	<p>a) i) The divergence of the vector field <math>\vec{f} = 3x^2\hat{i} + 5xy^2\hat{j} + xyz^3\hat{k}</math> at the point (1,2,3)</p> <p>a) 89 c) 124</p> <p>b) 80 d) 100</p> <p>ii) Mathematically the functions in Green's Theorem will be</p> <p>a) continuous derivatives c) continuous partial derivatives</p> <p>b) discrete derivatives d) discrete partial derivatives</p>	2 M	1	L2
	<p>b) Find the value of the constant 'a' such that the vector function <math>\vec{A} = y(ax^2 + z)\hat{i} + x(y^2 - z^2)\hat{j} + 2xy(z - xy)\hat{k}</math> is solenoidal. For this value of 'a', show that <math>\text{curl } \vec{A}</math> is also solenoidal.</p>	8 M		
06.	<p>a) i) The Gauss divergence theorem converts</p> <p>a) line to surface integral c) surface to line integral</p> <p>b) line to volume integral d) surface to volume integral</p> <p>ii) The curl of <math>\vec{f}(x, y, z) = x^2\hat{i} + xyz\hat{j} - z\hat{k}</math> at the point (2,1,-2)</p> <p>a) <math>2\hat{i} + 2\hat{j}</math> c) <math>4\hat{i} - 4\hat{j} + 2\hat{k}</math></p> <p>b) <math>-2\hat{i} - 2\hat{j}</math> d) <math>-2\hat{i} - 2\hat{k}</math></p>	2 M	1	L2

**Department of Mathematics**

	b) Using stoke's theorem, evaluate $\int_c xydx + xy^2dy$ where c is the square in the x-y plane with vertices (1,0), (-1,0), (0,1) and (0,-1)	8 M		
07.	a) i) A vector field which has a vanishing divergence is called as a) solenoidal field b) rotational field c) irrotational field d) none of these  ii) A vector field with a vanishing curl is called as a) irrotational b) solenoidal c) rotational d) none of these	2 M	1	L2
	b) If $\vec{F} = (axy + z^3)\hat{i} + (3x^2 - z)\hat{j} + (bxz^2 - y)\hat{k}$ is irrotational, find a and b. Also find scalar function $\phi$ such that $\vec{F} = \nabla\phi$	8 M		

CO1	Illustrate the application of multivariate calculus to understand the solenoidal and irrotational vectors and also exhibit the inter dependence of line, surface and volume integrals.
CO2	Demonstrate various physical models through higher order differential equations and solve such linear ordinary differential equations.
CO3	Construct a variety of partial differential equations and solution by exact methods/method of separation of variables.
CO4	Explain the applications of infinite series and obtain series solution of ordinary differential equations.
CO5	Apply the knowledge of numerical methods in the modeling of various physical and engineering phenomena.

## Online test process

**Circular**

Department of Basic Sciences and Humanities

Date: 22/09/2021

**Circular**

The third internal assessment is scheduled online on 24<sup>th</sup>, 25<sup>th</sup> & 27<sup>th</sup> of September 2021.

The timetable for the respective IA is as provided in the table.

<i>Third online Internal Assessment Time Table</i>			
Date	Time	Physics Cycle	Chemistry Cycle
24-09-2021 Friday	10.00 am to 11:30 am	18ELE23	18ELN24
	3:00 pm to 4:00 pm	18EGH28	
25-09-2021 Saturday	10.00 am to 11:30 am	18PHY22	18CHE22
	2:30 pm to 4:30 pm	18EGDL25	18ME25
27/09/2021 Monday	10.00 am to 11:30 am	18MAT21	
	2:30 pm to 4:00 pm	18CIV24	18CPS23

Note the timings of English and EGD.L.

*Ravellat*  
for IA coordinator 22/9/21  
(Dr. Avinash. K)

Forwarded to Dean Academics for further necessary action

*Govinde Gowda* 22/9/21  
Dean Academics  
(Dr. Govinde Gowda M S)

Forwarded to Principal for approval

*Basavaraj L*  
Principal  
(Dr. Basavaraj L)

Copy to all departments for their reference.

## Online test paper deployment and submission form in MS Teams

18CHE55      4AD30CS030

3(a) Trans esterification  
 (b) Antiknocking agent

3(c) A fuel cell is a device which converts the chemical energy of a combustible fuel & oxygen into electrical energy it is also known as electricity generator

CH<sub>3</sub>COOH-O<sub>2</sub> fuel cell

Construction:-  
 In this cell methanol is used as a fuel & oxygen as an oxidant, the anode is a porous nickel sheet on which platinum-palladium catalyst is deposited, the cathode is a silver impregnated porous nickel sheet methanol containing some sulphuric acid is circulated through the anode chamber pure oxygen is passed through the cathode chamber & sulphuric acid is placed in the central chamber acts as electrolyte, A membrane

4AD30CS030

is placed adjacent to the cathode on the inner side of the minimize diffusion of methanol into the cathode thereby reducing the concentration of methanol near the cathode otherwise methanol diffuses through the electrolyte into cathode & undergoes oxidation

Working:-  
 At the anode:  $CH_3OH(l) + H_2O(l) \rightarrow CO_2(g) + 4H^+(aq) + 4e^-$   
 At the cathode:  $\frac{1}{2}O_2(g) + 4H^+(aq) + 4e^- \rightarrow 2H_2O(l)$   
 Net reaction:  $CH_3OH(l) + \frac{1}{2}O_2(g) \rightarrow CO_2(g) + 2H_2O(l)$  + energy

4AD30CS030

3(a)  $Y_2O_3$   
 (b) Acid reflection  
 (c) PV (photo voltaic) cells are the devices which convert the solar energy into electrical energy

Construction:-

→ A typical PV cell of silicon consists of thin wafer of thickness of around 300um of p-type silicon on one side of this, an ultra thin (say 0.2um) layer of n-type is placed on the other side of thin p-type silicon & that is covered completely wafer. metal electrodes, made up of

4AD30CS030

4 (a) PV cells are ecofriendly  
 (b) cheaper than  
 (c) production of solar grade silicon:-

the process involves the following steps  
 the hydrogenation of tetrachlorosilane through a bed of metallurgical silicon is carried out in a fluidized bed reactor

$$3SiCl_4 + 2H_2 + Si \rightarrow 4SiHCl_3 \quad (1)$$

the trichlorosilane is separated by distillation while the unreacted dichlorosilane is recycled back to the hydrogenation reactor

the purified dichlorosilane is passed through a fixed bed column filled with quaternary ammonium ion exchange resin acting as catalyst dichlorosilane gets converted into dichlorosilane

$$2HSiCl_3 \rightarrow H_2SiCl_2 + SiCl_4 \quad (2)$$
